GEOMETRIC CYCLES

Virginia HERNANDEZ "Luna Rosa"

<http://www.lalunarosa.fr>

For me, the world evolves in the middle of a perfect geometry. Everything cycles in time, in inter-linked figures. The spiral becomes a source of light that turns inward, towards the absolute; the circle in identical instants, the square in order of the Universe... To try to look at reality that surrounds us with another look: the world that never stops its cyclical movements. I give a spiritual sense to the situations and emotions, using an objective vision and an aerial perspective. This way I have a significance to reality, my painting knife like a channeling vector to transmit a message.

That is why art is my tool, my therapy and my caffeine!
